

MAUDSLAY STATE PARK ASSOCIATION

DEDICATION TREE PLANTING

Information: Park office 978-465-7223
info@MaudslayAssociation.org

A visit to Maudslay State Park will rejuvenate your spirit. Walk through the gardens and plantings and take a moment to sit by the Merrimack River. Take a walk on one of the many enchanting paths and trails. Touch a tree that has stood guard at a trail junction for a hundred years.

Rhododendrons and mountain laurel provide a riot of color and scents in May and June and compliment the more formal plantings in the Rose and Italian Gardens

The Dedication Tree Planting is a perfect way to help rejuvenate and restore the Park and honor someone at the same time. A dedicated tree planting will replace dead or damaged trees or will enhance current plantings and gardens.

Time, disease, insect infestations and weather all take a toll on the trees within the park. Replanting lost or damaged specimens must be done with species appropriate to the historical aspects of the park and this can be expensive. Your participation in this Dedication Tree Planting Program makes the restoration possible. The Park Manager will confer with you and recommend the type of tree that is needed, where it can be situated and recognition. Cost will depend on the many factors, including species and size of the planting. The program is designed to replace trees that have been lost and not to introduce new plantings in keeping with the historic aspects of Maudslay State Park. The recommended donation is \$250.00
